

### **Data Centers and associates:**

I can accept several truckloads of FoPC now!!! We need samples.  
Please call or email me.

We expect to be collecting Fiber optic Patch Cable (FoPC) in Aug (tentative). There are a few more FoPC materials samples to be tested.

**This is a proprietary process.**

**The purpose of this memo** is to request if you have interest in this effort and, if so, what are the expected quantities or volumes.

Early approvals have been shown that we can accept materials on Reels/in Boxes/Hand Coiled on pallets/Bales/and Roll-offs bins).

**IMPORTANT:** No one in the US or Canada is doing this today. This FoPC is PVC jacketed and has PVC buffer tubes. It is of low-value material. Some we may ship overseas (NOT China). However, we have tests underway to manufacture products to be resold in the US and around the world.

### **MORE:**

- ✓ *Would this information be of interest to your Upper Management, your Board, or to the Local Communities you serve?*
- ✓ *Does this opportunity play into any of your future Marketing or Sales plans?*
- ✓ *Or, does this concept just strike a Moral cord to you?*

*Question- what do your Techs, Installers, or Decommission crews do with this scrap material?*

I look forward to hearing from you.

(see more info at our web site- Loading Dock tab 4)
